“Brevetti Internazionali Campagnolo S.p.A.” is a leading Company that through the high qualifications of its technicians and the experience of its skilled workers has established a worldwide reputation for products in various technological sectors. It has created all the cycle racing articles presented in this catalogue.

Campagnolo products are held in highest repute by qualified engineers and leading sportsmen alike, because of their superior quality confirmed by the numerous victories gained in every field, not only by the leading professional riders but also amateurs in every country.

Articles which have been often imitated but never equalled.

N. B. Any person infringing Campagnolo patents, trade marks, and registered designs will be prosecuted.

CAMPAGNOLO®

BREV. INTER. CAMPAGNOLO®

Brevetti Internazionali Campagnolo is identified with its founder, the current President and Managing Director - Tullio Campagnolo.

On the 11th November 1927 Tullio Campagnolo, by that time a recognised amateur racing cyclist, is competing in a hard cycle race being run on roads in the Dolomites. Suddenly the weather turns to intense cold with snow on the scene resembles winter on the difficult twisting road on the Aune Cross Pass.

Campagnolo is in a good position but punctures. His fingers are so numb with the cold that he cannot unscrew the wing-nuts which hold his wheel in the frame. He loses valuable time but thereby conceives ideas which will change the mechanics of racing cycles.

A clever and imaginative engineer - Campagnolo begins to produce and patent a series of prototypes of cycle accessories which will eventually make him famous throughout the world.

Though an undisputed leader in the field of special racing components, Campagnolo also has interested himself in other fields such as special lightweight magnesium wheels for racing, Grand Touring, Sporting and Production cars. He also excels in this field and from wheels for Formula One racing cars has moved into special parts for the automotive field of motor cycle, aviation and aerospace industries.

Campagnolo - Tullio

Tullio Campagnolo competing on the Aune Cross Pass during a cycle race November 11th 1927.

This short introduction is an abbreviation of the many and varied activities of Brevetti Internazionali Campagnolo S.p.A. and what it produces in several factories all controlled to the same standards of scientific and technical accuracy.

Campagnolo produces for:

The Aviation and Aerospace Industry components for aeroplanes, helicopters, scientific research rockets, sounding balloons, satellites... etc...

It is in this field wherein a few highly qualified companies only may operate, able to guarantee the highest degree of accuracy and quality of the rigidly controlled production.

The Motor-Car manufacturing Industry wheels made of superlightweight Elektron alloy for sports, racing and touring motor-cars, as well as special engine and carframe components. Motor-car manufacturers such as: Ferrari, Abarth, De Tomaso, Autodelta, Lancia, Alfa Romeo, Maserati, Lamborghini, Tecno, Iso Rivolta... etc..., use Campagnolo wheels because they are the lightest in weight, the most durable, the safest.

The Motor-Cycle Industry alloy wheels, hubs and special parts for racing and sports motor-cycles.

The Mechanical Industry in general pieces for any appliance or plant or operating machines, for which it is necessary to combine maximum lightness with maximum strength.

Campagnolo also produces articles for the gifts and sports trades. Among the former let us remember the patented giant cork-screws permitting even the most resistant corks to be easily and safely extracted, and the nut-crackers, which do not break but do crack the nuts. With the latter are now included tennis rackets made of special ultralightweight alloys.

Campagnolo

Campagnolo employs more than 2,000 skilled production workers and is constantly expanding. It exports directly to approximately 100 countries including all european markets, every american state, and a large number of African and Asian nations. Exports account for approximately 80% of the total production.

The most modern production processes, the use of high-grade materials, the most stringent controls, the most accurate workmanship distinguish all Campagnolo articles.

This catalogue, renewed in its general lines also with the introduction of colours for ease in reading it and making easier the identification of pieces and sets which they belong to, supersedes the previous ones.

This catalogue revised in its general layout has had colours introduced for ease of reading and identifying component parts of the various articles. It supercedes all previous issues.

IMPORTANT

Orders not stating catalogue part reference numbers against each article will not be executed.

“Brevetti Internazionali Campagnolo S.p.A.” reserves the right to make design changes when necessary for technical advancement, without previous notice.
